

Guide d'installation – Hugging Face

Ce guide explique pas à pas comment :

1. Créer un compte Hugging Face
2. Confirmer son adresse e-mail
3. Générer un Access Token pour utiliser Hugging Face (Transformers, Inference, etc.)

1. Création du compte Hugging Face

1. Rendez-vous sur : <https://huggingface.co>
2. Cliquez sur Sign up / Join Hugging Face
3. Renseignez :
 - Email address (idéalement votre email professionnel)
 - Password
4. Cliquez sur Next

The image shows the Hugging Face sign-up page. At the top is a yellow emoji with a wide smile and its hands near its face. Below the emoji, the text "Join Hugging Face" is displayed in a bold, black font, followed by the tagline "Join the community of machine learners!" in a smaller font. The form contains two input fields: "Email Address" and "Password", each with a placeholder text of the same name. A hint text below the email field reads: "Hint: Use your organization email to easily find and join your company/team org." Below the password field is a "Next" button. At the bottom of the form, there is a link that says "Already have an account? [Log in](#)". At the very bottom of the page, a small note states: "SSO is available for [Team & Enterprise](#) accounts."

2. Compléter votre profil

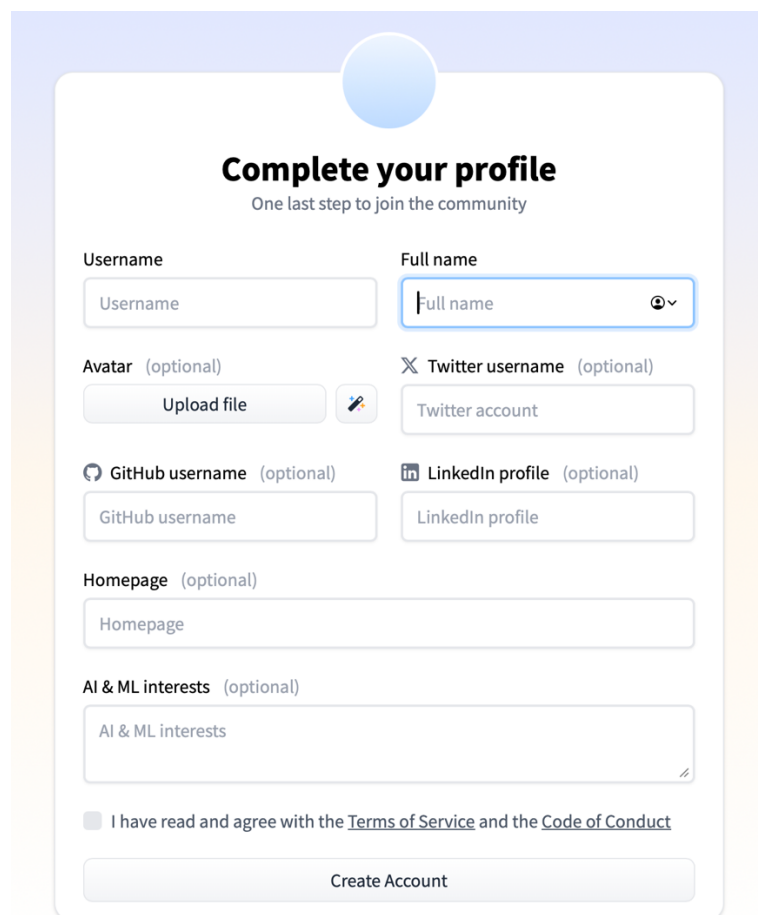

Sur l'écran **Complete your profile** :

- **Username** : identifiant public (unique)
- **Full name** : votre nom complet
- (Optionnel) :
 - Avatar
 - GitHub / LinkedIn / Twitter
 - Homepage
 - AI & ML interests

Cochez :

- ☒ *I have read and agree with the Terms of Service and the Code of Conduct*

Puis cliquez sur **Create Account**.

The screenshot shows a web form titled "Complete your profile" with the subtitle "One last step to join the community". The form is set against a light blue background with a large blue circle at the top. It contains several input fields and checkboxes. The "Username" field is on the left, and the "Full name" field is on the right. Below these are optional fields for "Avatar" (with an "Upload file" button and a small icon), "Twitter username", "GitHub username", "LinkedIn profile", "Homepage", and "AI & ML interests". At the bottom, there is a checkbox for "I have read and agree with the Terms of Service and the Code of Conduct" and a "Create Account" button.

Create Account

3. Confirmation de l'adresse e-mail

Après la création du compte :

1. Consultez votre boîte mail
2. Ouvrez l'email envoyé par **website@huggingface.co**
3. Cliquez sur le lien **Confirm your email address**

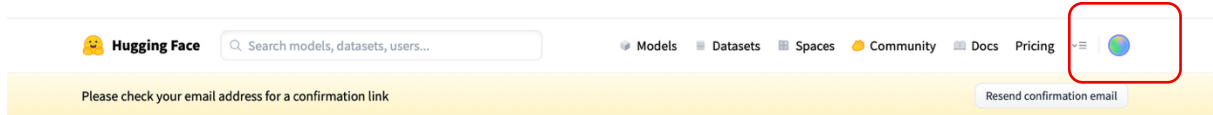

⚠ Sans cette étape, certaines fonctionnalités (tokens, inference) ne seront pas accessibles.

4. Accéder aux paramètres du compte

Une fois connecté(e) :

1. Cliquez sur votre **photo de profil** (en haut à droite)

Getting Started with Inference Providers

Hugging Face Inference Providers unifies 15+ inference partners under a single, OpenAI-compatible endpoint. Move from prototype to production with the same, unified API and no infrastructure to manage.

Hugging Face Inference Partners

Your first LLM call

Here we are going to make your first inference request to an LLM using moonshotai/Kimi-K2-Instruct-0905.

Write a dialogue between two characters meeting for the first time.

Send

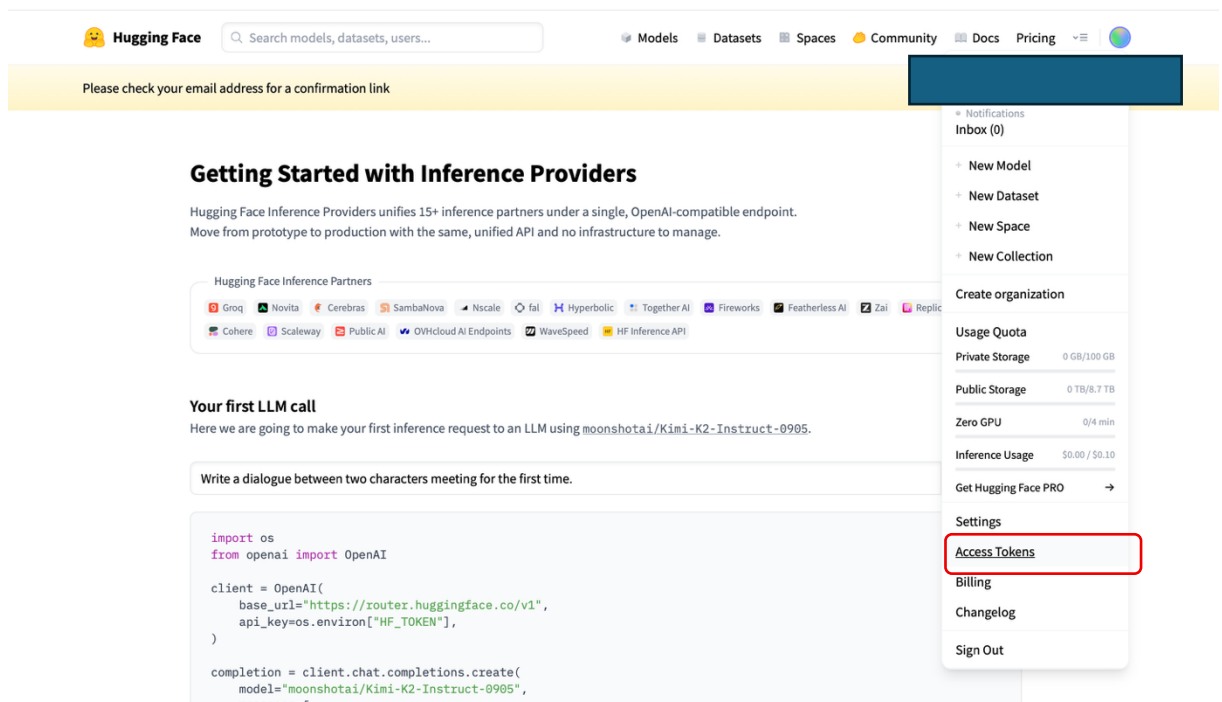

```
import os
from openai import OpenAI

client = OpenAI(
    base_url="https://router.huggingface.co/v1",
    api_key=os.environ["HF_TOKEN"],
)

completion = client.chat.completions.create(
    model="moonshotai/Kimi-K2-Instruct-0905",
    messages=[
```

Copy

2. Allez dans la section **Access Tokens**

5. Créer un Access Token

1. Cliquez sur **Create new token**

Access Tokens

User Access Tokens

+ Create new token

Access tokens authenticate your identity to the Hugging Face Hub and allow applications to perform actions based on token permissions. ⚠ **Do not share your Access Tokens with anyone**; we regularly check for leaked Access Tokens and remove them immediately.

You have no Access Token

2. Renseignez :

- **Token type** : « Fine-grained »
- **Token name** : par exemple « transformers »

Permissions recommandées (cas standard)

Cochez au minimum :

- Repositories
 - ☒ Read access to contents of all public gated repos you can access
- Inference
 - ☒ Make calls to Inference Providers
 - ☒ Make calls to your Inference Endpoints (si utilisé)

👉 Laissez le reste décoché sauf besoin spécifique (écriture, orga, billing, jobs...).

< Create new Access Token

Token type

Fine-grained Read Write

⚠ This cannot be changed after token creation.

Token name

transformers

User permissions

Repositories

- ☒ Read access to contents of all repos under your personal namespace
- ☒ View access requests for all gated repos under your personal namespace
- ☒ Read access to contents of all public gated repos you can access
- ☒ Write access to contents/settings of all repos under your personal namespace

Webhooks

- ☒ Access webhooks data
- ☒ Create and manage webhooks

Discussions & Posts

- ☐ Interact with discussions / Open PRs on repos under your personal namespace
- ☐ Interact with discussions / Open PRs on external repos
- ☐ Interact with posts

Inference

- ☒ Make calls to Inference Providers
- ☒ Make calls to your Inference Endpoints ⓘ
- ☒ Manage your Inference Endpoints ⓘ

[Scope to specific endpoint\(s\)](#)

Collections

- ☒ Read access to all collections under your personal namespace
- ☒ Write access to all collections under your personal namespace

Billing

- ☐ Read access to your billing usage and know if a payment method is set

Jobs

- ☐ Start and manage Jobs on your behalf

3. Cliquez sur **Create token**

Read access to contents of selected repos
View access requests for selected gated repos
Interact with discussions / Open pull requests on selected repos
Write access to contents/settings of selected repos

Org permissions
None if not specified.

Search for orgs

Repositories

- Read access to contents of all repos in selected organizations
- View access requests for gated repos in selected organizations
- Interact with discussions / Open pull requests on repos in selected organizations
- Write access to contents/settings of all repos in selected organizations

Org settings

- Read access to organizations settings
- Write access to organizations settings / member management

Resource Groups

- Write access to resource groups in selected organizations

Inference

- Make calls to Inference Providers on behalf of the selected organizations
- Make calls to the organization's Inference Endpoints
- Manage the organization's Inference Endpoints

Collections

- Read access to all collections in selected organizations
- Write access to all collections in selected organizations

Jobs

- Start and manage Jobs in selected organizations.

Create token

6. Sauvegarder le token (étape critique ⚠)

Une fenêtre **Save your Access Token** s'affiche :

- Copiez immédiatement le token
- Stockez-le dans un endroit sûr (password manager, vault, .env)

⚠ **Le token ne sera plus jamais affiché après fermeture de la fenêtre.**

Cliquez sur **Done**.

Save your Access Token

Save your token value somewhere safe. You will not be able to see it again after you close this modal. If you lose it, you'll have to create a new one.

[Token value]
